

Meet NEXA

Sharing Bot

What is NEXA? (Profit Sharing Model)

NEXA is TSG's **Profit Sharing Trading Bot Model**, designed for users who want automated crypto spot trading without paying monthly rent.

◆ How NEXA Works

You connect your **Binance API** (no withdrawal access).

The bot trades automatically using advanced strategies (scalping, grid, trend-following, breakout).

At the end of the month, **profits are shared** between the user and TSG based on the selected plan.

No fixed rent — you pay **only from the profit the bot generates**.

◆ Key Features

Profit-based model → Zero monthly rent

Secure & Non-custodial (funds stay in your Binance account)

Emotion-free 24/7 trading

Transparent trade reporting

Multiple strategies for higher accuracy

◆ Who Should Choose NEXA?

Users who want:

- ✓ No monthly rent
- ✓ Automated trading
- ✓ Share profit instead of paying upfront
- ✓ A long-term earning model
